KRISTOFER J **SYEVENS**

Software Engineer | kris@syevens.com | 832-520-3327 | www.syevens.com

SUMMARY

Creative, detail-oriented, software engineer with deep interest in Artificial Intelligence and Blockchain technology. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech organization with global reach.

TECHNICAL SKILLS

Languages:	TypeScript – JavaScript – Python – Java – SQL – NoSQL – HTML – CSS
Technologies:	MongoDB – Express.js – React.js – Node.js – PostgreSQL – Tailwind – Bootstrap – Sass – Redux – MVC
Tools:	VS Code – Chrome Dev Tools – Git – GitHub – Bash – NPM – Postman

TECHNICAL PROJECTS

Bug-Zapper | Full-Stack   12/2022-1/2023
- Developed a full-stack web application serving as a ticket management system, utilizing React, Express, Node, MongoDB, and Redux.
- Implemented authentication and CRUD functionality, ensuring secure and efficient data management.
- Designed a mobile-responsive UI, allowing for seamless use on all devices.

Trackr | Full-Stack   11/2022-12/2022
- Utilized modern technology stack, including React.js, Express.js, Node.js, and MongoDB, to deliver a well-performing and reliable application.
- Built the back-end REST API utilizing the MVC architecture, providing a seamless integration with the front-end interface.
- Implemented secure authentication and data management features to ensure confidential information is protected.
- Designed a user-friendly interface, allowing for quick and efficient tracking of job applications from multiple sources.

GitHub-Lookup | Front-End   12/2022
- Built a front-end React application that consumes the GitHub API, allowing users to easily search for any existing GitHub profile.
- Utilized 3rd party data visualization libraries to present data in an intuitive and engaging manner.
- Incorporated authentication via Auth0, ensuring secure access to the application.

PROFESSIONAL EXPERIENCE

Software Engineer   01/2022 – Present
Freelance
- Built semantic front-end applications utilizing React.js, Bootstrap, and Tailwind libraries.
- Consulted with clients to develop user stories that were directly integrated into their final products.
- Utilized my proficiency in HTML, CSS, and JavaScript to create responsive designs and optimize for mobile devices.
- Implemented cross-browser compatibility solutions while working with CSS frameworks such as Bootstrap or Sass.
- Utilized my experience with JavaScript library React to implement dynamic functionality on personal projects.
- Adhered to accessibility and web standards while working on personal projects and open-source contributions.

Branch Manager/Senior Loan Officer   08/2020 – Present
Southwest Funding, LP.
- Built a Spanish version of the online mortgage application website, reducing the time to consult Spanish-speaking clients from three days to six hours, allowing for efficient and effective customer support.
- Designed and developed a landing page that successfully converted social media lead campaigns, generating 54 leads within the first 90 days of launch, resulting in increased customer acquisition and lead generation.
- Lead team of 3 operations team members, fulfilling 170 loan originations in 2021 resulting in $1.7MM in corporate revenue and placing our branch in the top 1% company-wide.
- Developed and launched digital marketing campaign targeting internal sales partners that resulted in 4 new branches onboarded within the first week.
